## HRx Expands Human Resource Outsourcing Services

With the rising demands on Human Resource Managers to recruit and retain star talent, it has become necessary to streamline and automate more human resource processes, even in a fully staffed HR Department. In response to the changing employer needs of credit unions, HRx and Corporate Business Solutions have expanded their partnership to include HR Management Solutions, an Administrative Services Organization (ASO).

**Corporate Business Solutions**

HR Management Solutions provides customized outsourcing solutions that allow the Human Resource Manager to focus on more strategic business initiatives by reducing administrative burdens. These services include payroll administration, benefits administration, and web-enabled Human Resource Information Systems and employee self-service options.

According to Jim Karle, President of Corporate Business Solutions, "ASO services can best be described as an outsourced Payroll and HR department for your business without the co-employment aspect of the Professional Employer Organization (PEO)."

For more information on this new service, contact Liz Aperauch at [liza@HRx.net](mailto:liza@HRx.net) or 866.834.4479 x1142.

*(HRx is a national human resources firm specifically meeting the needs of credit unions.
